**NEIC-1232: Duplicate children will be able to be identified and merged. Reduce duplication and cleaner data.**

**KEY ASSUMPTIONS:**

1. The Children can be merged only if the current Jurisdiction of the child matches the user state who is trying to do the merge. This is to ensure that in the Cloud CMS states don't merge other state children
2. The NEICE CMS will be doing a soft linking of these children, what that would mean is since it has an established multiple INTERSTATE child IDs we may need to keep the interstate ids intact while sending transmittals to other state.
